A.W.N.A. CONVENTION

New President for 1961-62, Alberta Weekly Newspaper Association, standing on the left, Ernie Jamison, of the Ponoka Herald, in the centre is William Draayer, of the Wetaskiwin Times, who presented the new president with the gavel, and on the right is past president Jack Parry of the Rimbey Record.

Seated in front is the Hon. Alvin J. Hooke, Minister of Municipal Affairs who was guest speaker at the final banquet of the A.W.N.A. Convention held in the MacDonald Hotel, Friday and Saturday, October 12 and 13.

NOTEBOOK...
cont. from page 11, col. 3.

which extends from north of Swan Hills to the Brazeau River, was a visitor in Drayton Valley recently.

He was on his way through to the Ranger Station in Lodgepole.

Mike said he and Kaye wished to greet their old friends. Of course, like all well-informed persons, the Burkes subscribe to the P.N.A

SHADES OF '63. The earliest drilling rig in these parts, the Reading and Bates rig No. 3 that drilled the historic No. 1 Discovery well for the oil company which we now know as Mobil Oil of Canada had a driller by the name of Frank Hoge, who later became a tool push and pushed drill rigs in all parts of the world drilling for this strange viscuous fluid which we call petroleum.

Mr. Hoge is back in Drayton Valley for a few days. He is now superintendent petroleum company, International Helium, International has Cascade Drilling Co. employed to drill some holes for them in the Lodgepole area.

After he left Drayton Valley in 1954, Mr. Hoge pushed rigs in offshore drilling in the Gulf of Mexico, on the north coast of South America and in Kywait, Arabia. He said that when he first came to Drayton Valley in 1953 he boarded with Mr. and Mrs. Jack Tucker in the building that is now occupied by the Pembina News Advertiser. Mr. Hoge was very sorry to hear that both Mr. and Mrs. Tucker had now passed on. He said they both treated him like a longlost son, giving him pots of coffee in off-hours and looking after his welfare in many other ways.

****

JACK DEAKIN

Old-line newspaper men have long been immortalized in movies and fiction; Jack Deakin is typical of the old-line newspapermen, with perhaps one exception: most of them were boomers, and Jack has stayed put pretty well on one job.

He was born in Edmonton. He didn't say just when and we d didn't ask him. He started earning his own living at the age of fourteen as a messenger boy for the C.P.R. Telegraph.

He was three years in the East, east of Edmonton that is, with little afraid that he might starve death. . . however, he did survive. He went to work for the old Edmonton Bulletin. Spent three years in the East (east of Edmonton that is) with the Sudbury Daily Stars and the Winnipeg Tribune and returned to Edmonton. When the Journal took over the Bulletin Jack went along and has been with the Journal for lo, these many years He is Provincial Editor. He now has some thirty years in newspaper work behind him.

He went to work at an early age with the Canadian Press. His mother was pleased when young Jack came home one night and told her he had quit his job with the C.P.R. and gone to work as a reporter... but she was also a

Once a sports editor, his favorite sports are hockey and baseball.

Jack is well-known to many Drayton Valley folks as he has covered many events here for his paper.

PEMBINA NEWS ADVERTISER 10c PER COPY

VOL. 6 . No. 40 October 25, 1961. Playford Publisher. Box 190, Drayton Valley.

HUDSON'S BAY CELEBRATES 2nd ANNIVERSARY

Now celebrating its second year serving Drayton Valley the Hudson's Bay store has proved a very good adjunct to the business and shopping section of this growing, progressive town.

Undoubtedly the store has brought in many additional thousands of dollars into the town and district since it was first opened at the end of October, 1959. Most of this would have gone to other larger centres. The opening of the new store has proved the faith the Hudson's Bay company has in the future growth of the town and district.

The large department store has attracted business from surrounding areas, particularly from across the river. When buyers have come into Drayton Valley to shop in the Bay they have also shopped in the many other fine retail outlets that were to be found in Drayton Valley.

The store maintains a permanent staff of some 18 persons. Mr. Klapp is manager. Assistant Manager is Mr. Jack Kerr. Ron Elsemzimmer is in charge of the Grocerteria, Stephan Kupferschmidt is in charge of the Mens Wear department and Malcolm Cambridge is office manager.

Toastmistress News

PEMBINA TOASTMISTRESS CLUB TO HOSTESS COUNCIL No. 7 SPRING CONFERENCE OF TOASTMISTRESS CLUBS.

Three Drayton Valley Pembina Toastmistress Club delegates attended the Fall Conference of Council No. 7 of International Toastmistress Clubs, held in Saskatoon over the past weekend. Those attending from the local club were, Shirley Tolchard, Margo Meiers and Doris Kerr. Held in the Vessborough Hotel in Saskatoon, the conference was declared a huge success by the some eighty delegates who attended.

An important resolution of the Pembina Club was introduced and passed by the conference. It was to the effect that a committee be appointed to investigate the possibilities of the establishment of a Canadian outlet for Club jewelry, so that club insignia and jewelry may be purchased in Canada. At present it is exported in under high duty.

Drayton Valley won over Calgary for an invitation to play hostess to the Spring Conference of Council No. 7, Northern Region, International Toastmistress clubs. The local club expects to hostess about 75 women delegates from Saskatchewan and Alberta at this three day affair, which will be held the weekend of April 6, 7 and 8th, 1962.

On Friday night the hostess club will start off the events with a Coffee Party. On Saturday the business meeting will be held in the morning, followed by a luncheon honouring the presidents. On Saturday evening a banquet will be held featuring the Speech contest for Council No. 7 at which time

JAMES LORNE KLAPP

Mr. Klapp was born in the Manitoba town of McCreary where he attended public school; attending high school in neighboring Kelwood.

In 1950 he joined the staff of the Hudson's Bay Company in Winnipeg. In the course of his service with the Hudson's Bay Company he has worked in a large number H.B.C. stores in Manitoba, Northern Ontario and Northern Manitoba. In addition to that he was attached to the Head Office in Winnipeg for a period of two years.

In recent newspapers was a picture of the nickle mine in Thompson in northern Manitoba. Mr. Klapp opened the first Hudson's Bay store in Thompson, for the Hudson's Bay Company in 1957. At that time Thompson consisted of about twenty tents. They slept in sleeping bags for the first few weeks. Thompson now is a city of some 10,000 persons.

Prior to coming to Drayton Valley Mr. Klapp was managing the Hudson's Bay store at Lynn Lake, Manitoba. Lynn Lake is the site of the big Sherritt- Gordon Nickle Mines, producing mine for the Fort Saskatchewan smelter.

Lorne is acting Chairman of the Board of Stewards for the United Church, he is a member of the Drayton Valley Golf Club, the Bowling Club and the Curling Club and is a member of the Chamber of Commerce. He is active, also, in a number of community activities.

Mr. Klapp was sent by his company to open the new Hudson's Bay store in Drayton Valley in 1959, which was officially opened on October 29, 1959. This week the Bay is celebrating its second anniversary.

Canadian Coachways Bus Depot

Pembina Bus Lines, operated by Mr. Stan Franklin, came into the area in early 1954, soon after the discovery of oil here and operated buses from Edmonton to Drayton Valley. During the next few years that the bus was in operation here the bus depot was located in several different places. Mrs. V. Heyland took over as agent for the bus company in March , 1960, and not long after that Canadian Coachways bought out Pembina Bus Lines and Mrs. Heyland remained in charge of the bus depot as agent for Canadian Coachways, handling the expanded service that the new line offered. Before the building of the new bus depot the depot was formerly located in the postoffice building.

The bus depot has also been the headquarters for the Edmonton Journal and from there have gone out from 600 to 800 copies daily.

The present bus depot was opened for bus traffic in May, 1961 and to June Mrs. Gloris Byers opened the Coffee Shop. On the first of October Mrs. Byers disposed of her interest in the coffee shop to Mrs. Heyland, who is now operating the coffee shop in addition to acting as agent for Canadian Coachways.

The new bus depot has been a very fine addition to the Town. An extremely well constructed and attractive building, with the large neon signs on top of the building, it makes an excellene appearance. Bus service, too, has been improved and expanded. Under the able direction of President Mickey Collins of Canadian Coachways the local line serving this district shas shown much progress. Bus service is now provided to Edmonton on Highway 57 east, via Alsike and Calmar, as well as the regular route north on 57 to Highway 16 into Edmonton.

The location of the bus depot, right on the corner, with adequate parking facilities has helped out in the handling of the traffic of those who deal with Canadian Coachways, as bus passengers, or in shipping or receiving express via the bus. The parking facilities are adequate, also , to take care of the increased traffic to the bus depot which the restaurant has brought in. The bus depot was built by Buchholtz Construction.

Try and Stop Me
By Bennett Cerf

"Twas the night after Christmas, and a wealthy psychiatrist, father of five children, sat exhausted in his easy chair. "You might say," he advised his wife, "that I am suffering from a severe case of Santa Claustrophobia."

* * *

Morey Amsterdam tells about a Scotch couple he overheard discussing the coming birthday of their young hopeful. "Angus," said the mother, "tell me he'd like either a bicycle or a tricycle."

"Why don't we wait till January," said get him an icicle!"

* * *

Miss Chou Chou Hermiest buttoned a diamond-studded vicuna coat around her miniature poodle and took him for a walk up East River Drive one fright January afternoon. When she came home, she was indignant. "You won't believe this," Chou Chou told her maid, "but do you know that 90% of the dogs on this drive don't even have overcoats!"

Congratulations

TOASTMISTREES NEWS, cont. from page 1, col. 3.

Toastmistress members will compete for speech awards,

On Sunday brunch will be served; at which time they will hold an installation of officers for the ensuing term. Margo Meiers is Council co-ordinator.

This three day event will be a big thing for Drayton Valley and the local Pembina Club delegates showed real loyalty to their home-town, and real forensic and debating skill in presenting reasons why the big event should be held in Drayton Valley next spring instead of in Calgary, as had been originally planned.

COUNCIL MEETING

The regular meeting of Council was held October 12, 1961, at 8:00 a.m. in the Council Chambers in the Town Hall. Those present were: Mayor Adrian Meier Deputy Mayor D.G. McKenzie,

Councillors: H. Demers, J. Swanlo, H. Zolmer, C.D. Fuhr and K. Wahl.

The minutes of the previous meeting of September 14th were read and adopted as read. The list of accounts was read and passed for payment. The Appropriation Balances Statement, the Statement of Revenues Collected, and the Financial Statement were examined and accepted for filing.

The Mayor placed the Municipal Inspector's Report before the Council for reading and information. The Secretary was directed to check the various items mentioned and make a report to the Chief Municipal Inspector.

Council confirmed the decision of the committee to purchase a 10' x 12' building from Mrs. Helen Rhooke for setting up in the Nuisance Grounds for the Supervisor Paul Familinow.

Council accepted the information of the Committee regarding our banking and then tabled the matter till next meeting.

Council resolved that the Hockey Fee for 1961-62 session for Intermediate Players be set at $150.00 for the Hockey Team of approximately twenty players.

It was the decision of Council to proceed with the Swimming Pools plans by getting all data and information that the water supply of the town be raised from the present .4 p.p.m. of fluorides to 1.5 max. p.p.m. He pointed out that the benefit to the teeth of the district would be good payment for the costs and work involved. He also pointed out that in Acme, Sask., the content of water is 6. p.p.m. of fluorides and the health of the community was not ulteriorly affected. He suggested that Council plan to hold a plebiscite of the town to give the residents a chance to voice their opinions.

It was the agreement of Council to proceed with plans to hold a plebiscite to give residents the chance to voice their opinions on whether they want fluoridation of the water supply. Dr. Shimbashi's report was accepted for filing.

Mr. Rybank, of Western Swimming Pools Ltd., gave a short commentary on the construction and erection of a swimming pool. Pool size 42' x 82 1/2' - Olympic standards, skimmer system. He recommended that swimming pools be left full of water and frozen. He is prepared to furnish the town with a package deal.

Council directed that the applications for Winter Works Project Benefits be made as follows.

1. Water and sewer extensions - new subdivisions.
2. Swimming Pool Construction.
3. Gravel stockpiling, crushing and hauling gravel.
4. Street construction - gravelling and paving.
5. Sidewalks, curb and gutter construction.
6. Tree planting, boulevard improvements.
7. Water and sewer service installations to new building developments.

Council directed that the re-zoning of Lots 9 and 12 of Block 11, Plan 5935 H.W. be advertised immediately as being changed from Tourist to Commercial Zone and that a By-law No. 244, authorizing the re-zoning be given first reading.

The Secretary was instructed by Council to write to White, Trott, White, the solicitors, and advise that plans for sidewalk for 50th Street South have been postponed.

Council authorized that as many members of Council as possible that go to the convention be in favor of setting up a central office for the Union of Alberta Municipalities.

Council authorized the appointment of a committee of the whole Council to analyse and examine the Interim Control Order document as prepared by the Municipal Ministers office for putting into effect by the Town of Drayton Valley.

Council granted approval to the request for subdivision of 4 acres of land along the easterly extension of 50th Avenue in SE 1/4 Sec. 16-49-7-W5. for the purpose of a Drive-In Theatre on the East side of Town, providing it is only to be used for a Drive-In Theatre.

Council directed that a request be made to the Department of Municipal Affairs to close the Vandergrift roadway to all vehicle traffic because of in danger and hazards to traffic.

By-law No. 242, authorizing the financing of sidewalk, curb and gutter construction was given first reading.

By-law No. 246 authorizing the doption of the Real Property Assessment Roll of 1961 and 1962 was given first, second and third readings, and finally declared law.

Council directed that the Curligg Club be credited with the sum of $4,500.00 as being the value put in to the buildding by the Curling Club and that this be applied against the rental fees for the year 1959 to 1962.

Council accepted the Town Engineer's recommendation with regard to placing Dave Rand on the payroll as Grader Operator on the Town Staff at a salary of $300.00 per month.

The meeting adjourned on motion from the Council.

Notebook

PLEASE TAKE NOTE: The Scouts are gathering broken toys for redistribution at Christmas. Toy may be left with Mike Gormley at the Town Hall, of ath the P.N.A. office.

Australian compess termites construct a slab-like nest 8 to 12 feet high with narrow ends pointing due south and north. Zoologists believe the insects instinctively put the facings east and west to get maximum sunlight for drying their sand masonry.

VAUXHALL

The new Vauxhall Victor sedan is totally redesigned. It is lower, wider and slightly longer than the previous model. It has many engineering refinements; smoother riding suspension, longer wheelbase and a slight increase in torque and horsepower.

OSHAWA, Ont. -- A radical design change is part of the totally new 1962 Vauxhall Victor models to be introduced soom by General Motors of Canada.

The four-cylinder British-built cars are lower, wider and slightly longer. They have been engineered to provide a more relaxing ride and more passenger room.

This is the Victor's greatest design change in years. Over 400, 000 Victors have been built in the past.

The new models have more headroom, hip and shoulder room as well as wider doors. Five can travel in comfort in the new Victor. The trunk, too, is even more spacious with the spare wheel out of the way in the right side wheel arch.

The 92 cu. in. engine is not radically changed, though an increase in compression ratio to 8.1 to 1 and a redesigned inlet manifold increase horse-power and torque. New 3-point engine mounts provide even greater smoothness and flexibility. The use of lighweight alloys on clutch housing, induction manifold, transmission cover and other parts has resulted in important savings in weight.

Optional at extra cost on all new Victors is a 4-speed transmission controlled by a short floor-mount ed lever. This transmission has synchromesh on all four forward speeds-- the first time ever on a popular-priced British car. Standard equipment is the 3-speed all-synchro transmission with steering column change and a much-improved control mechanism.

Safety measures abound on the new Victors-- sharp edges and protuberances have been eliminated; all doors incorporate 'anti-burst' devices in the special locks vision is improved, with considerably more glass area and a windshield one-third larger; the area wiped by the parallel wipers is 60% greater than on previous models.

'Controllability' gains significantly from improved location of brake and accelerator pedals, revised instrument panel and controls layout, and increased seating comfort.

Routine maintenance costs on the new Victor have been cut because there are only four lubrication nipples, needing attention at intervals of only 12, 000 miles. Intervals for other service items are 3, 000 miles apart. Brake adjustment is simpler; engine access much easier.

The new Victors have the best paint finish and most effective metal protection in Vauxhall history. A long-life cellulose synthetic enamel finish is now being used-- it is more wear-resistant and retains its lustre longer. Beneath it are several layers of phosphate coating, primer and undercoat. The entire underbody, including the underside of the fenders, is sealed and protected with a generous coating of tough bituminous sealer. All bright metal above the waistline is stainless steel.

The new Victors are available in four versions-- the Standard, Super and De Luxe sedans and an eye-catching new station wagon. Color and trim options vary from six on the standard sedan to 14 (seven two-tone schemes) on the De Luxe.

On the Super and the station wagon series, bucket type front seats are now optional equipment. The De Luxe has bucket front seats in eleather upholstery. Heater and defroster and windshield washers are standard equipment.

The six-cylinder Vauxhalls--- Cresta and Velox-- are basically unchanged. But they now offer such optional equipment as individual front seats, centre arm rests in rear seats and leather or nylon upholstery in the Cresta.

The large-size Vauxhalls are all finished in a hard cellulose--synthetic enamel that retains its lustre longer .

CIVIL DEFENCE

CONTINUED FROM PREVIOUSLY ELEVEN STEPS TO SURVIVAL.
STEP 11. Cont.

SHELDING:

The most effective protection is to place some heavy material between yourself and the fallout. The heavier the material the better protect(on. Fortunately, many common materials give excellent protection. The materials and design of the fallout shelter recommended in Blueprint for Survival No. 1 will stop penetration of 99% of outside radiation.

Similar protection can be gained from these materials:

1. 16 inches of solid brick.
2. 16 inches of hollow concrete blocks filled with mortar or sand.
3. 2 feet of packed earth.
4. 5 inches of steel.
5. 3 inches of lead.
6. 3 feet of water.

A fallout shelter is the best way to protect your family and yourself against radiation because:

1. It keeps the fallout at a distance.
2. It shields you from radiation.
3. The time spent there is the period when radiation is most intense.

By providing your family and yourself with a shelter, you are unlikely to suffer serious effects from radioactive fallout.

PERSONAL DANGER FROM FALLOUT.

Radioactive particles in contact with your skin for a few hours may produce a burn. Follow Step 9 to prevent injury. Thoroughly wash your hands and utensils before preparing or eating.

The Chapel Hour

Where Was A Garden

When Jesus had spoken these words, He went forth with His disciples over the brook Kedron where was a garden, into which He entered, and His disciples. — John, 18:1.

Taken From Family Herald.

The word garden is one of the most pleasing in our language. We find this word about 40 times in the Bible. The first instance is in Genesis 2:15, "And the Lord took the man and put him into the garden of Eden to dress it and keep it."

The garden has always represented the beautiful and satisfying in life; it is the bestower of hope and healing.

I know a woman who said that in the time of sore trouble, the beauty of her garden, and her love for it kept her sane.

There are lovely phrases in the Bible such as , "The Garden of God," and "The Garden of the Lord."

Wordsworth said,
"I found a garden some time ago,
on the side of a lonely hill
Where some blossoms nodded,
that had not been grown by a
gardener's skill;
And as I parted the waving grass
where few feet had ever trod,
I said in my heart with reverent
awe,
'Lo! this is the Garden of God!"

Great Importance

Humanity's love for the garden is one of the most unifying influences for good on earth. When one sees a man working in his garden or on his farmland, one can conclude that his attitude to life if good, Emerson wrote, "A farm is a mute Gospel." The farmer is engaged in the world's oldest miracle, and when he sees life once again emerging out of the death of winter, he believes more firmly that the faith in his soul for another life is not just a wind
is not just a wild and hopeless dream.

The garden that Jesus loved was of the greatest importance. What happened there was universally significant and linked time with eternity, earth with heaven, death with life.

Once again Jesus led His disciples to this garden, "For He oft-times resorted thither," with them. It was a garden of great privilege. Here He revealed to His disciples the deep thoughts and secrets of His heart. Here Jesus shared with them the golden hours, and they in turn committed themselves to high tasks and gave Jesus the allegiance of their hearts. This garden was the place, "Where spirits did blend, and friend held fellowship with friend."

It was also a garden of great responsibility. Here in this garden Jesus had helped them to realize the purpose of His life and theirs. He would depend on them in the future. "Ye shall be witnesses unto Me, both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost parts of the earth."

Great Responsibility

Great and far-reaching was to be their responsibility. Sharers now and soon to be bearers of His love and Spirit. They were being blessed to bless, saved to serve, and receivers soon to go out and give.

The fine issue of Christ was the redemption of the world. This fact was brought home to Peter when called upon later, under the shadow of the cross of His Master , to be true to his garden-privileges, fellowship and pledge. Just before his third denial of Jesus, a servant of the High Priest said to him, Did I not see thee in the garden with Him?"

We can imagine what the breaking of the garden spirit and plege meant to Jesus. But Peter later recovered from his failure through the renewal of his pledge, and by receiving the grace of Divine forgiveness and restoration.

It was in this garden that Jesus later rested a little, before He was arrested. Judas knew the place, he had been there many times with the other disciples. This man had shared the high fellowship, but had failed in the high responsibility.

Many have been the Gospel's blessings in our lives, Many have been the privileges through the church of our Master. Sacred dedications were made. When tempted to lower the standard, to be untrue to the great ideals, have we not heard the words, "Did I not see thee in the garden with Him?"

Sharing those golden hours; sealing those sacred bonds of fellowship. Are we as loyal as we once were? Have the vows been fully kept? If not, we can renew them.

It was in this garden where hard things were done. Where Jesus fought and won His greatest battles. Where He passed from, "If it be possible let this cup pass from me," to, "Not my will, but Thine be done." The place He made all things new, and all things possible for humanity.

AS ONE UNKNOWN

He comes to us as One unknown, without a name, as of old beside the lakeside. He came to those men who knew Him not. He speaks to us the same words, "Follow thou me," and sets us to the tasks He wishes us to fulfill for our time. He commands, and to those who obey Him, He will reveal Himself in the conflicts and sufferings which they shall pass through in His fellowship, and as an ineffable mystery, they shall learn in their own experience Who He is.

-- Albert Schweitzer.

LODGEPOLE UNITED CHURCH W A NEWS

The ladies of the Lodgepole United Church W.A. were hosts recently to the ladies of the Afternoon branch of the Drayton Valley W.A. and the ladies from the Cynthia group. The meeting which was well attended (34 members and guests) was held in the Audio-Visual room of the Lodgepole School.

The meeting with the president Mrs. C. Harris in the chair opened with the singing of the Doxology, and the members' Creed. The secretary, Mrs. R.J. Elliott read the minutes of the previous meeting and roll call was answered with a seasonal verse. Letters were read acknowledging donations to St. Stephen's College and the Rev. Peter Paris' Mission in Nigeria.

Mrs. L. Kay presented the Devotional with the scripture taken from the 65th psalm, and the theme "Let us be thankful", followed by the hymn, "Come Ye Thankful People Come".

Mrs. Harris welcomed the guests and introduced the speaker of the evening, Mrs. Raine from the Brazeau Dam. Mrs. Raine who was beautifully attired in native sari, spoke informally of the new India. She told her audience that under the rule if the British, the native students were submerged, with little or no incentive to develop a culture of their own. This has been changed in the short span since independence, and great strides had been made in every field of the arts and sciences and industry was flourishing. Changes, too had been made in education, which formerly was possible only for those who were able to pay for it and was now compulsory. Even with all this, there were only about 20% of the vast population o f 400 million who could be considered literate.

Mrs. Raine described for her listen an the Caste system, which she compared to the parts of the body, with the head represented by the priests or professional men; the trunk represented those who sustained life, such as the food merchants; the arms the workers, and the legs those who waited on the others.

Soon it was realized that there was no place for those who did the menial tasks, such as street sweeping, and the leather workers (it is against the belief of the Hindus to touch anything that is or was dead) These were the Outcasts, and they were a pitiable lot. They could not enter the temple or use the water from the public wells. If any of the other members of the caste even to much as looked upon them, he had to immediately change his clothes and bathe or he, too would be shunned by the others. It was these poor creatures for whom Mahatmi Gandhi fought so valiantly. Mrs. Raine explained that it was possible to change status in the Caste if one qualified.

(Cont', on page 11, Col. 1)

LUTHERAN CHURCH NEWS

There were twelve ladies, Pastor Steyer and Mr. Fred Tookey present at the October meeting of the Ladies Aid.

Mr. Tookey showed a film on Stewardship, which was most interesting and informative.

Election of officers followed the spiritual part of our meeting and the following were elected scheduled to take office at the November meeting.

President- Mary Schuman,
Vice-President- Naomi Schneider
Secretary- Hazel Charbonneau,
Treasurer- Eleanor E. Sendflesh

(Cont.' on page 11, Col. 1)

COOKING MAGIC

Clean Cool Cooking with the Clean Blue Flame of GAS

Tested Recipes and Meal Planning Ideas Prepared for Pembina News Advertiser Readers by the Home Service Department of Northwestern Utilities, Limited.

Venison is usually in plentiful supply at this time of year if you have a big game hunter in the family. To help you cook this meat here are our favorite recipes. Venison, by the way, is the term used for any antlered animal.

VENISON ROAST

THOROUGHLY RUB A LEG OR LOIN OF venison with salt, pepper and shortening. Place on rack in shallow pan. Place thin strips of salt pork or bacon over the roast. Roast in a moderate gas oven (325oF.) 30 minutes per pound. If venison is marinated before roasting, drain marinade from it but place it still dripping, on rack in shallow pan. Season with additional salt and pepper if none is used in marinade.

BARBECUED VENISON

Heat in large heavy skiller over medium gas flame... 3/4 cup salad oil.
Thoroughly brown in hot oil.... 1 - 5 lb. leg of venison.
Place venison on rack in shallow pan.
Add to oil remaining in skillet...
1 1/2 cups tomato juice
2 tsp. salt
1/2 tsp. chili powder
Dash red pepper
1 tsp. Worcestershire sauce.
1/4 cup minced onion
3 tbsp. brown sugar
1/4 cup vinegar
1/4 tsp. pepper
1/2 tsp. prepared mustard tabasco, or garlic powder.

MARINADE

Combine 1 part vinegar or lemon juice with 3 parts salad oil or olive oil. Season with preferred spices. Dill seed, celery seed, cloves, thyme, bay leaves, sliced onions, garlic cloves, celery leaves, parsley sprigs and sliced carrots are good. Place meat in large bowl or crock and pour the marinade over it. Place in Gas refrigerator 3 to 4 hours for small cuts, 10 - 12 hours for large cuts.

Smith insisted on having one night out a week, alone. Every Tuesday night he went. One Tuesday night he went out and didn't come back for seven years. When he did come back, his wife was so happy that she phoned all her friends.

"What are you doing?" Smith shouted.

"I'm arranging a welcome home party for you tonight."

"What?" yelled her husband. "On Tuesday?"

GREEN ACRES

Earl C. Lowe, District Agriculturalist.

MANGE IN HOGS

Rubbing or scratching, along with a skin condition should make one very suspicious of mange. Hogs don't rub often for the fun of it. The reasons for mange, lice, dirt or skin disorders from other causes. With mange the pig rubs due to the itchiness caused by mange mites burrowing in the layers of the skin. Serum oozes out forming a scab or crust causing a further irritation. This serum collects dirt and dust, and is often mistaken by the owner for sunburn or just a dirty skin.

The first lesions usually appear on the head of the hog around the ears, eyes, or nose where the skin is more tender and the hair thin. From there the conditions spreads over the neck, shoulders, back and sides, and may involve the entire body. Mange lesions first appear as reddened areas but become thickened, wrinkled, scabby and darkened. The scabbiness is increased through the injury from rubbing to relieve the itchiness. The skin in the region of the eye is often the first to show evidence of mange and is often though to be only dirt.

If the condition is neglected the pigs become unthrifty and stunted. At the early stages of mange, rubbing may be noticed before the skin shows much change. In any case a mangy pig that is rubbing, often in preference to eating, is not going to make the best gains or show a good feed conversion ratio. In other words, it costs money- often wasting a lot of it.

The disease is usually spread by contact but it may be transmitted by intermediate objects such as brushes and brooms used for brushing infected swine and by infected bedding, walls, posts, etc. against which infested pigs have rubbed. Mange mites can live for a week or longer off the body of a pig which is the basis for a thorough clean-up of the premises as part of the treatment.

The mite is scarcely visible to the naked eye. To be certain if it has to be examined under a microscope. The female mite after being bred, burrows into the outer layers of the skin, depositing 10 - 25 eggs in the burrow from one to three weeks. She then perishes in the burrow. The eggs hatch in 3-10 days and the young mites reach maturity in another 10 - 12 days. Upon reaching maturity they migrate to the surface of the skin to mate, either by way of the burrow or simply forcing their way through the roof of the burrow.

A positive diagnosis is made by finding the parasite by microscopic examination of skin scrapings. It is important that a good sample be collected. It is advisable to obtain the scraping from a moist area which indicates recent burrowing and mites are more easily found. A knife can be used for scraping off the material and it should go deep enough to cause blood to ooze a little to be sure of getting the outer layers of the skin. This should be put in a small bottle or jar with atight cap or cork and taken to a verterinarian with a microscope or sent to a Veterinary Laboratory, along with data on symptoms, number of pigs affected, etc. This may aid in a helpful diagnosis in case the skin condition is not due to mange.

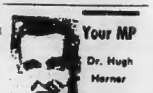
Several drugs are satisfactory for treatment. One of themost convenient and effective is Lindane. This should be used strictly according to the manufacturer's directions because like most insecticides, it is poisonous under some circumstances. Nor should it be used on pigs approximately 30 days before slaughtering. Pressure spraying gives deeper penetration of the drug which is desirable to get the best results. Applying with a brush or cloth can be quite effective too.

In real bad cases the animal can be scrubbed with soap and water first to remove a lot of the loose scab. This will permit the drug to get at the mites in the bedding on the floor, etc., is a discouraging procedure. Remove all the bedding, scrub the walls with a strong lye solution, or spray with Lindane.

Crude oil is a fairly effective mange treatment applied with a swab or brush. This is useful where oly a few animals are to be treated. Unused crude oil is a good treatment for little pigs.

When nursing sows are treated with Lindane it is wise to wash the udder and nipples with soap and water half an hour later before the little pigs are allowed to nurse, as younger animals don't always tolerate most insecticides the same as more mature stock. Pools of Lindane or lye solution on the floor should be eliminated too.

A good skin tonic to put these pigs back into shape is to feed one teaspoonful of raw linseed oil per 100 lbs. of pig for two weeks.



$230, 450 dollars will be the Federal contribution to building Forest Access Roads in the constituency of Jasper-Edson, Dr. H. Horner, M.P. announces.

This is 50 per cent of the total cost of these roads. It represents a policy of helping the Provincial Government develop forest access roads to allow for better forest fire protection and better management of our forest roads in the program include the following:

Deer Mountain Road --$5, 000

Swan Hills Road --- 14, 000
Sweathouse Road --- 3, 000
Codesa Road ------- 1, 000
Nose Creek Bridge -- 20, 000
Kaiwa Road ------- 10, 999
Cutbank Bridge ---- 6, 990
Economy Creek Road 145, 000
Smoky Road ------- 20, 200
Heavysound Road --- 30, 000
Windfall Road ------ 10, 000
Lodgepole-Lovett Road 33, 000
Simonette Road --- 63, 000
Hay River Road --- 28, 200
McLeod Cutoff Road 3, 500
Brazeau-Lovette Road. 55, 000
Pinto Lake Truck Trail 8, 000
Prairie Creek Road -14, 000
$460, 900
Federal Share..... $230, 450

Total contribution by the Federal Government to the Province of Alberta for Access Road will be in the neighbourhood of $655, 350. These are the figure for 1961-62 which have been released by the Federal Department of Forestry.

WITH POWER

Four-fifths of all the work in Canadian industry is performed by electricity.

How to cut your gas heating costs!

CHECK YOUR INSULATION

A poorly insulated house is a heat waster! Loose-fill insulation in the attic may be shifted during repair work or moving stored items. Be sure there are no bare spots in your attic—for most heat loss is through the ceiling. In some homes additional insulation will greatly reduce the heat loss. Why not check YOUR home to be sure?

REPLACE DIRTY FURNACE FILTERS

Dust-laden furnace filters restrict the flow of air, and can cause overheating of your furnace, serious loss of heat to upstairs rooms and wasted fuel costs. All types of filters should be cleaned regularly, and replaced when necessary. (While you're at it, see that your furnace motor and fan bearings are lubricated as instructions indicate.)

TIME FOR STORM WINDOWS

Your home, like you, needs to breathe. Don't turn your house into a "sealed box," but avoid gaps in windows and doors which cause drafts and waste heat. A little weather-stripping usually does the trick! You paid for the heat in your home, keep it there, where it belongs.

A PROPERLY ADJUSTED FURNACE SAVES FUEL

The gas company service department is ready at all times to assist you by adjusting heating equipment to maximum efficiency. With a gas furnace in your home, you are enjoying the benefits of the cleanest, most efficient and dependable home heating fuel in the world! It's yours at reasonable cost and when your heating system is operating efficiently and you avoid heat loss caused by lack of insulation, drafty conditions around doors and windows and plugged furnace filters, you get full value for your heating dollar.

Looking at Recreation

By: Michael Gourley.
Recreation Director.

HOCKEY NEXT ON THE AGENDA.

With the white blanket spread generously over hill and dale and with temperatures well below normal it would seem like an opportune time to get on the hockey bandwagon for a change. One thing, the weather during the past week would have been much more favorable for puck chasing than for touing the old pigskin. If early threats am any indication of the future, it could be that Old Man Winter will be taking over relatively early this year and consequently our hockey season could be on us before we know it. One way or another it would seem that we are not more than a month away from the blades and the skillealghs.

At this writing it would seem that we are headed for one of our finer hockey seasons here in Drayton Valley. Of course, to much depends on the weather as the season progresses, however, the winter program as planned should be all-inclusive and over the season should prove highly satisfactory to all concerned. The program will be set up along the same lines as last year with a few minor changes, here and there. Last year's setup seemed quite favorable to all our youthful hockey enthusiasts, therefore, we can presume that the organization was fundamentally sound and the same steps can be followed closely for the coming season.

Clayton Rosenberger who did an exceptional job last year as CO-ordinator of the Minor hockey program has agreed to act in this capacity again during the coming season. He will again be assisted in this work by Bill Ward one of the community's most enthusiastic exponents of Minor hockey. The Minor program as planned will feature hockey played at four levels, PeeWee, Bantam, Midget, and Juvenile which should include about a dozen teams and furnish entertainment for approximately 120 of our youngsters. Now this is only an estimate figure and in the event that 150 or 180 boys want to play hockey we certainly will enlarge the leagues and teams accordingly, however, from past records in hockey, baseball and football it seems that 130 is the maximum participation in any one sphere of athletics.

In the Pee Wee group, that is boys up to and including twelve years of age, we hope to ice six teams in an intra-town league. After a regular schedule of ten to fifteen games the teams will play off for the beautiful B.P.O.Elks Trophy won forthe first time last year by Bill Ward's Canadiens". From the star players in this league a team will be picked to represent the town in exhibition games with teams from other centers. It is not likely that we will be entering any Pee Wee team into the Provincial Playdowns.

The setup among the Bantams, the twelve-fourteen age level, will be similiar to that of the Pee Wees. Once again we hope to have at least three teams competing in an intra-town loop with a regular schedule and a playoff for the conveted Rotary Trophy. Nick Urchyshyn and his Rotarians carried away the silverware last spring. As in the case of the little fellows, an All-Star Bantam team will be picked from this league to play out-of-town games and there is a possibility that those youngsters will get a crack at Provincial competition this year.

At the Midget level taking in boys from fourteen to sixteen years of age, there will be only one team. The team, known as the D. V. Klippers, will again be coached by Charley Davies. An attempt will be made to form an official league for those boys with Wabamun, Warburg, and some other interested center in the district. Such a loop, however, is still far from a reality and it will certainly take some doing on the part of someone if it is to operate this season. If no league competition is available the team will play a series of exhibition games and enter the Provincials. Those Klippers should mark into a pretty snappy crew come playdown time.

The Pipeliners, sponsored by Pembina Pipeline will once again carry the "Valley" colors in Juvenile competition. The likelyhood of their entering a league seems quite remote, however, they will take on all available competition on an exhibition basis and go on to play in the Provincial Playdowns.

The rink schedules will probably be along the same lines as last winter with the Pee Wees getting the ice every evening from 5:00 to 6:30 P.M. and the Bantams using the freeze from 6:30 - 8:00 P.M. three nights a week. The Midgets will likely take over at this time during the remainder of the week while the Juveniles and the Intermediate team will split the ice time during the later hours of the evening. It has been strongly suggested by some coaches and other interested personnel that more ice time be spent in practice and coaching even at the price of cutting down the schedules and sacrificing a few games. This of course, would involve only the teams playing in the intra-town leagues at the Bantam and Pee Wee levels. Personally I am in favor of this procedure as last year it was a case of game after game with little or no time for practice which certainly was not to the advantage of all concerned.

Les Tucker has accepted the position of rink supervisor and caretaker again for the coming season. Les did a very creditable bob last year and beyond the shadow of any doubt he is the man for the job.

So things are shaping up reasonably well in the hockey picture. A meeting of all prospective coaches and all interested persons will be held in the Recreation Office onWednesday, evening, November 1, at 8:00 P.M. I would strongly recommend that anyone who is in any way interested in the promotion of our National Pas-time at a local level attend this meeting. Most of the policies governing the coaching methods and standards of play at each level will be set at this meeting. Make it a point to attend and bring a constructive criticism or suggestion along with you.

WHIST DRIVE: Something new will be introduced into the local recreation picture very shortly. On Friday evening, November 3, the Drayton Valley Athletic Association will sponsor a whist drive. The event will take place in the B.P.O. Elks Community Hall and will get underway at 9:00 p.m. sharp.

Clayton Rosenberger is in charge of proceedings and he is lining up a program which should be highly satisfactory to all concerned. He plans a full evening of card playing featuring a couple of dozen whist hands within an approximate two-hour time limit. This whist game is not at all difficult and whether an individual has played the game for years or he is a raw beginner it makes little difference. If this venture is at all successful the D. V. A. A. plans to run such drives or tournaments on a monthly basis throughout the winter.

Should anyone not be familiar with the Drayton Valley Athletic Association and its activities, it is the sponsoring body for recreation and athletics among our youth, All forms of sports and branches of athletics played locally at the Minor level are under the auspices of the Association. The D. V. A. A. is composed of twenty-one members and regular meetings are held on the first and third Thursdays of each month. Cpl. "Skip" Wilson of the R. C. M. P. is president of the organization All regular meetings are open to the public and any advise or suggestions regarding the promotion and operation of the local athletic program will certainly be accepted and given consideration.

So come November 3rd. you will have the opportunity to enjoy an exciting evening of whist while giving a helping hand to the sponsorship of the local athletic and recreation program. Will be seeing you at the D. V. A. A. Whist Drive.

FIGURE SKATING NEWS: The D. V. Figure skating Club which had a pretty successful season last year is laying plans for the 1961-62 season. Recently The Club President, Bill Couch sent out a circular letter to all club members and parents concerned. The purpose of the letter was to gauge the approximate interest in figure skating during the coming season. A general meeting of the Club and an election of officers for 1961-62 has been proposed. This meeting will take place early in November and as soon as the exact date is known it will be made public. It is also planned to take some definite steps toward affiliation with the Canadian Figure Skating Association this year.

If your interests lie along the lines of figure skating you would do well to get in touch with the Club Secretary, Mrs. Helen Robbins at 542 - 3031. She will be happy to give you any information required regarding the Club and its activities.

FOOTBALL VICTIM OF WEATHERMAN. What was planned to be the outstanding weekend of the local football season turned to absolutely nothing for the pigskin people. An important Pee Wee fixture featuring the Eskimos and the Lions scheduled for last Saturday had to be proponed because of the premature winter weather. Then the big doubleheader feature between Camrose and D. V. was set for Sunday afternoon on the local gridiron. We cleared away the white stuff and were all set for action regardless of the inclemency of the elements, however, a call from Camrose on Saturday evening stated that for various reasons neither of their teams could make the trip and thus we drew a complete blank as far as our grid program was concerned.

The only grid action during the past week apart from a few sporty practices sessions was an exhibition affair at the Pee Wee level last Wednesday evening. In this one the Lions under Rev. J. C. Wiuff and Al' King measured the Stampeders 12- 8. The Lions got off to a fast start on T. D.'s by Jimmy Kay and Wayne Thompson and never looked back. The Stamps on the other hand were having a little rustle with the flu bug as quarterback Barry Johannesson and three other regulars were missing from the lineup. Ronnie Mickelow took over at quarter and did a tremendous job, throwing three passes for approximately forty-two yards, rushing for a good fifty or sixty and going all the way for a touchdown on one of his jet propelled end runs. Give this

LODGEPOLE UNITED CHURCH W. A. Cont. from page 7, Col. 4

The speaker explained the veneration of the cow, stressing the fact, that meat was not necessary in India, and that there were not enough cows in any case, to feed the starving people. She also told us of other Hindu beliefs. At the conclusion of her address, she invited questions, which she answered with many a witty anecdote as illustration. The meeting adjourned with the theme prayer, After which the ladies spent a most enjoyable hour over coffee and refreshments served by Mrs. W. Meston, Mrs. S. Kuzio, with Mrs. G. Primrose and Mrs. J. Hale assisting.

Reported by Charlotte Kay, Lodgepole.

LUTHERAN CHURCH NEWS (Cont'. from page 7, Col. 4)

Altar Committee- Enid Adams, Dorothy G. Rendflesh.

Dorothy G. Rendflesh is convening the supper on Monday, October 23rd. following the Winkle Conference. to be attended by district pastors in the area.

There will also be a fellowship Supper on Friday , November 17, following the conclusion of the Every Member Visitation.

The ladies aid are catering to this, It is to be a potluck supper and each member is asked to bring a main dish plus desert for his family. Naomi Schneider and Dorothy E. Rendflesh are convening this affair.

A tea, bazaar and bake sale is scheduled for Friday, November 3rd to be held in the premises previously occupied by Curt's Photo Studio from 2:00 to 6:00 p.m. Xmas cards, and all occasion cards will also be available. Dorothy E. Rendflesh and Dorothy G. Rendflesh are taking care of arrangements.

A donation of $10.00 is being sent to the College Kitchen Fund at Concordia College in Edmonton along with several donations of pickles to celebrate their fall shower day on Sunday, October 29th.

Enid Adams is hospital visitor for the month of November.

Dorothy E. Rendflesh and Dorothy G. Rendflesh will be cleaning the church for the month of November.

Following the meeting a lovely lunch was served by hostess, Mrs. J. Metzger.

Our next meeting will be on November 16th.

LOOKING AT RECREATION (Cont. from page 10, Col. 5)

Mickelow boy s yard and he's gone - there are not too many to follow him down the gridiron.

If the weatherman can be a bit more clement there will be plenty of action next weekend. There are a couple of pre-scheduled Pee Wee games that should be played before the week runs out. Harold Townsend's Delphics take on Stettler Saturday and a team from Edmonton on Sunday in two home games, while the Spartans travel to Stettler on Saturday for a visit with the Wild Cats. If the weather is right we'll try to make up for last time .

CIVIL DEFENCE (Cont. from page 8, Col. 5)

ing food. Radioactivity from an area of fallout may produce illness in the unprotected individual after a few days. Follow Step 4 to prevent this injury. Radiation illness develops slowly and cannot spread to other people. Except for temporary nausea shortly after exposure, evidence of serious injury from radiation may only appear after an interval of a few days to three weeks. Loss of hair, loss of appetite, increasing paleness, weakness, diarrhoea, sore throat bleeding gums and easy bruising combined, indicate that the individual requires medical attention. Nausea and vomiting may be caused by fright, worry, food poisoning, pregnancy and other common conditions..

ALBERTA EMERGENCY MEASURES ORGANIZATION

EDMONTON , 16 October-1961--- The Alberta Emergency Measures Organization has announced that the Provincial Government Departments and Municipalities of Alberta will participate fully in the forthcoming National Survival Exercise to be held 13 - 14 November , 1961.

This Exercise will be known as Exercise TOCSIN B 1961 and will be a National test of Civil Emergency Plans and Civil Defence measures across Canada. Alberta will be operating jointly with representatives of the Federal Government and the Canadian Army from the Regional Emergency Headquarters in Penhold. Municipal Authorities throughout Alberta will be operating from local headquarters in constant communication with Emergency Zone Head quarters at Grande Prairie, Wetask iwin, Edmonton and Olds. These three centres will be in direct teletype and wireless communication with the Regional Headquarters at Penhold.

The lady became very annoyed when the Chinese houseboy brought the linens to her bedroom without knocking.

"That's all right, missy," he assured her. "Evly time come, lookee through keyhole. Nothing on, no come in."

WHOA, BOA --- that's big time net-minder Hank Bassen you're putting the forward rush on! The Red Wing goalie, handed this South American boa constrictor by Curator Elmer H. Taylor (left) when he visited the Calgary Aquarium recently, handled the creature as coolly as he handles the fast pucks tossed at him by NHL competitors. Product of the Calgary Brewery sponsored Buffalo Athletic Association, Bassen graduated to the pro leagues in 1954 after 11 years with pee wee to Junior A teams in Calgary. He is playing his second full season with the Detroit Red Wings.

A I D B HOLDS CONFERENCE

The Alberta Industrial Development Board will meet for a two day conference at Grande Prairie, November 2, and 3. The delegates, representing most areas of Alberta, will hear reports from senior Alberta business and government figures and visit the Northern Plywoods plant at Grande-Prairie.

Included in the heavy schedule will be a report on the Provincial Government's Trade and Industry Council Meeting, by J.E. Oberholtzer, Alberta Deputy Minister of Industry and Development, and an outline of governmental assistance in the development of forest products, by Alberta Forestry Director E.S. Huestis.

B.G. Barrow, Assistant Deputy Minister of the federal Department of Trade and Commerce will attend the meeting to acquaint the representatives with the Federal Government's future industrial development program.

Of particular interest to Peace River area residents will be a report by G.R. Heffernan, Managing Director of Premier Steel Products, on northern Alberta iron and steel development. Mr. Heffernan will discuss the extent of ore deposits, problems of development point of view.

The Industrial Development Boad , which meets twice a year, was organized by the Alberta Government to promote Alberta industrial development and formulate ways and means of attracting a new industry to the province.

ALBERTA DEPUTY MINISTER OF HEALTH RETIRES

A record of medical and public health service in Alberta dating back 37 years came to a close September 6 with the retirement of Alberta Deputy Minister of Health Dr. A. Somerville. He is succeeded to the post of Deputy Minister by Dr. M.G. McCallum, former Director of Medical Health Services for the Department.

A native-western Canadian, Dr. Somerville was born at Hartney, Manitoba, in 1898. He received his early education at Winnipeg. During World War I he served with the 1st Machine Gun Battalion in France and after the war entered the University of Manitoba. He graduated with his degree in medicine in 1924.

Dr. Somerville is well known in central Alberta having practised at Schville from 1926 to 1931 and at Ponoka from 1932 to 1936. He was absent from the province for one period during that time when he attended the University of Toronto, graduating with a Diploma in Public Health. Named Director of the Foothills Health Unit at High River in 1936, he served in that area until 1942 when he was named Assistant Deputy Minister of Health for the Province of Alberta. Succeeding to the position of Deputy Minister in 1952, he served in that capacity until his retirement.

Dr. Malcolm G. McCallum was born in Ohio in 1903 and at an early age moved to Alberta where his parents farmed in the New Dayton area near Lathbridge. Dr. McCallum received all his early education in Alberta, attending primary and high school at New Dayton and graduating from the University of Alberta with a Doctorate in Medicine in 1931. After interning at the Royal Alexandra Hospital in Edmonton, Dr. McCallum practised at Edson for one year and for the next six years resided at Fort McMurray. During 1941-42 he attended the University of Toronto graduating with a Diploma in Public Health from that institution.

Dr. McCallum opened the Stettler Health Unit in 1939 and served as its Director until 1947 when he joined the Alberta Department of Health as Director of Hospitals and Medical Service. This division was later divided and until his new appointment has been Director of Medical Health Service.

O. O. R. P. News

To promote interest in attending meetings, it was decided to have one social evening every other month. Lady Jenkins, Lady Beattie and Lady McMorris will be in charge of the entertainment at these meetings.

Lady McMorris and Lady VanLoss-

Finish First Phase Of $65,000,000 Dam

Waters from the lake created by the Brazeau Dam, 100 miles southwest of Edmonton will flow into the North Saskatchewan River during low periods next winter aiding the city's fight to combat down-river pollution.

Hon. L. C. Halmrast, minister of agriculture, Monday said an initial phase of the construction on the $65,000,000 project has been completed. He announced two conduits 1,000 feet long which have been carrying water under the dam construction have been closed and formation of the lake behind the dam has started. He said this winter, water from this lake will be fed into the North Saskatchewan as needed during the low-water periods.

READY FOR GENERATOR

Mr. Halmrast said during the winter 50,000 to 75,000 acre-feet of water will be available for increasing the river flow.

Calgary Power Company officials said construction of the dam, which started last year is one week ahead of schedule. Officials said the dam is at the phase where a generator could be installed for production of power during peak periods.

The provincial government is lending the power company $14,800,000 for the project. Mr. Halmrast said the money must be paid back but the provincial government's contribution to the dam construction will be lending the money without charging interest.

1964 COMPLETION

The dam is scheduled for completion in 1964. The lake created by damming the Brazeau River will be about 17 miles long and will at its peak contain 900,000 acre-feet of water. Calgary Power is scheduled to begin construction of its power plant next year. It will be several years before the lake is filled to its planned potential, Mr. Halmrast said.

The joint venture has a two-fold purpose: to regulate the flow of water into the North Saskatchewan to help combat down river pollution from Edmonton and to supply additional power.

Dam Site Cleared Of Valuable Timber

In a race with time, five lumber companies have cleared most of the marketable timber from the flood area of the Brazeau power dam site 100 miles southwest of Edmonton.

Monday the two conduits passing under the dam were shut and formation of a 17-mile long lake was started. With this in mind, the lumber men last fall began working hastily in the area to clear out all valuable timber.

More than 7,250,000 board feet were taken out of the six berths which were treed last winter and spring. One berth which lies above the projected flood level has not been cleared. Only marketable timber was removed. Small trees and underbrush were left to be covered by the waters of the newly-formed lake.

In addition to the lumber which was removed, round timber consisting of poles and posts accounting for 600,000 lineal feet was removed. Officials of the Lands and Forests Department said most of the lumber went to local markets and market value was estimated at more than $500,000.

"When the Brazeau dam was planned, thought was given to clearing the entire flood area. However, bids for the work were received and the lowest was in excess of $1,500,000.

This plan was abandoned and it was decided to divide the 8,700 acres involved into berths and suction them out. As soon as the berths were awarded, lumber companies moved in with machinery and last fall the echo of saws throughout the Brazeau River Valley was a familiar one.

Most of the lumber was cut at the scene and then brought out by truck for planing and finishing. No planers were in operation at the site.

Last Christmas, the government encouraged sale of Christmas trees from the site and more than 5,000 were cut and sold in Edmonton for an estimated $10,000.

The provincial government received royalties from the sale of the timber. The rate was reduced from the usual 10 per cent to a starting minimum of $1 per thousand board feet. Lumber companies then were permitted to bid on the berths and the royalty amount. Some paid as high as $9 per thousand board feet.

Monday the two conduits passing under the dam were shut and formation of a 17-mile long lake was started. With this in mind, the lumber men last fall began working hastily in the

on were presented with silber spoons for attending all the meetings last year. Lady Quinn, who is moving to Whitecourt in the near future, was also presented with a silver spoon as a going-away gift. We are all sorry to see her leave, and wish her bon voyage. Lady Gamblin was nominated to take over Lady Quinn's office as First-year Trustee.

A cash donation was given to the town band.

Reported by Aileen Ohlsen.

BEEF-FEEDERS TOUR

BEEF-FEEDER'S TOUR ENDS SUCCESSFULLY

Cattle feeders, farmers, feed mill operators and ranchers from Edmonton south to the border and from Lloydminster to Lundbreck recently have returned to work with new ambitions and fresh ideas concerning Alberta's beef industry. Their 2,400 miles tour, organized by Calgary Power Ltd. with the aid of various Chambers of Commerce, carried the group by bus, car and airplane through southern Idaho.

The prime purpose of the trip was to study custom and contract feed lots outside of Alberta with a view to expanding our own feeding industry, beyond the present 30% share held in the Canadian red meat market. Growth of the industry will require the knowledge of nutrition consultant and cost accountants as well as the skill of

COLD WEATHER OPERATION

The extreme cold weather test of a carburetor is the starting of a cold engine. Cranking draws the normal amount of fuel into the engine, but due to low temperature much of it does not vaporize. Also, some fuel condenses on the cold manifold, so that the mixture reaching the spark plug may be too lean to start combustion.

To counteract this leanness in a cold engine, extra rich mixtures are supplied to the engine by "choking." Air flow is restricted so that more fuel is drawn into the engine; thus the air-fuel ratio is richened. As the engine warms up, vaporization and condensation conditions improve and the choke is gradually opened to prevent needless rich mixtures.

Legion Elects New Zone Commander

A picture taken at the Canadian Legion Zone meeting held in Drayton Valley Legion Hall and Elks Community Hall on Sunday October 15th.

In the above picture they are, left to right, Austin Clark, new Zone Commander for the coming term of 61-62, Muriel Boles, President of the Drayton Valley Legion Ladies Auxiliary, Mrs Flook, District Commander of the Ladies Auxiliary, next is Ed. Coley, District Commander of District #2, and Mrs Betty Smith Zone Commander of the Legion Ladies Auxiliary. On the right is Steve Craddock, past Zone Commander, Zone #2. In view is Maurice McCullagh, president of the Drayton Valley Legion.

Drayton Valley Canadian Legion played host to delegates from Jasper , Hinton, Edson, Wildwood Evansburg, with visitors also from Edmonton on Sunday, October 15.

Purpose of the Zone Rally was the nomination and election of a new Zone Commander for Zone 2.

A business meeting was held in the Legion Hall, during the afternoon sessions, after which the group adjourned to the Elks Community Hall for dinner, which was followed by a very fine program put on by the local Legion Ladies Auxiliary.

ROTARY CLUB AUCTION

Drayton Valley Rotarians are getting ready to stage an auction sale, proceeds for which will go towards the various community projects that the Rotary Club carries on.

The auction sale will commence at one p.m. and will be held on the corner property behind Drayton Valley Motors.

Rotarians invite anyone with any "White elephants " on their hands to bring them to the sale where they may be disposed of, with the proceeds going to some worthy cause.

If you wish to get items in this auction contact Walter Krause at Scone Tire.

A Navy recruit lost his rifle on the firing range. When told that he'd have to pay for it, he protested. "Suppose I was driving a Navy car and somebody stole it. Would I have to pay for that, too?"

He was informed that he would have to pay for all government property he lost.

"Now I know," the recruit said, "why the captain always goes down with his ship."

In this picture Zone Commander A. Clark receives congratulations from past Commander Steve Craddock, while District Commander Foley looks on.

Two transport drivers were taking a cargo into Canada for the first time. Late in the evening, they stopped at a large town, parked their truck and entered a dinner. A cute waitress approached them.

"What town is this?" asked one of the drivers.

"Saskatoon, Saskatchewan," sang out the waitress.

The driver turned to his companion and exclaimed. "Now we're in a real mess. They don't even speak English here!"

Mr. David Glen Sr. is seriously ill in a Calgary hospital. Mr. Glen has been in poor health for some time and last week he suffered a relapse.

••••••••••

In spite of poor weather thirty ladies met at Mrs. Bohdan Urchyshyn's home on Saturday evening to honour bride-elect, Miss Rosalee Robinson.

The hostess was assisted by Mrs. Donald Chinko and Mrs. Ronald Smith.

Mrs. Urchyshyn had transformed one corner of her living room to look like a little house. The bride's chair was decorated with pink roses, and the whole room was made festive with pink and white streamers.

Mrs. Smith had prepared a game which the guests enjoyed. Miss Evelyn Kynock helped the bride open her many lovely gifts.

Later in the evening Miss Robinson's fiance, Mr. Malcom MacGregor, and the husbands of the guests joined the ladies for coffee.

••••••••

Mrs. Kenneth MacKenzie entertained at her home on Sunday evening in honour of Miss Sandra Pratt, whose marriage to Mr. Gowda is to take place in All Saints Anglican Church on Saturday. Miss Paulette Doyle and Miss Isobel MacKenzie assisted the hostess.

Balloons and confetti were used most effectively to decorate the living room for the occasion.

Mrs. Ian Waugh and Miss Gail Williams helped the bride to open her parcels.

Guest enjoyed an evening of games.

BEEF-FEEDER'S TOUR
(cont. from page 12, col. 5.

feed lot and machine designers. Such growth can only serve to strengthen the economy of the Province, create new jobs and increase the revenue from our land.

Idaho, with conditions similar to those in Alberta and with the cattle feeding industry exceeding the net returns from their famous potato industry, was an ideal area for such a tour. To aid in the free exchange of ideas during the intensive five day program, Mr. Frank Shields, Manager of the recently formed and progressive Idaho Cattle Feeders Association, joined the group at Idaho Falls. Acting as adviser, guide and organizer, he was assisted by government and university officials feed lot operators, veterinarians and others. The Idaho State Police provided an escort for the cavalcade of buses and cars, facilitating every move and eliminating all traffic difficulties. The tour was an all-out effort to share experiences and theories for the mutual benefit of two nations unhampered by iron curtain problems.

The rigorous schedule took the 116 Canadians through feed lots ranging in capacity from herds of 300 cattle to operations involving thousands of head. It included talks by leaders in the meat industry on Marketing Procedures , Outlook for the Future, Processing, Buying and Selling, Transportation and Retailing. An extentive look at Idaho Meat Packers and the King Packing Company made a lasting impression on the cattlemen by showing the end products of the feeding industry.

From the beginning, our tourists were invited to ask questions and the answers to those questions filled many notebooks. Although the Albertans paid particular attention to the varied feeding systems of American operators, it was generally agreed that each individual feed has to deal with his own brand of problem. Major benefits from the tour resulted from learning how others met their problems, the international goodwill created by the sharing of a common interest and the opportunity to return home with new knowledge, enthusiasm, ideas and a conviction that like Idaho, Alberta will grow and the beef feeding industry will grow with it.

The General Motors plant at Windsor, Ont., completed 1000 operations without a single lost time accident

1962 ENVOY

Here is the 1962 Envoy Custom four-door sedan. The new Envoy is a totally new car. It is completely redesigned and features more headroom, hip and shoulder room, as well as wider doors.

OSHAWA, Ont.--- The 1962 Envoy is a completely redesigned car, General Motors of Canada said today.

The four-cylinder British-built Envoys are lower, wider and slightly longer. They have been engineered to provide a more relaxing ride and more passenger room.

They have more headroom, hip and shoulder room, as well as wider doors. The trunk, too, is spacious with the spare wheel out of the way in the right side wheel well.

The 92 cu. in. engine is basically unchanged, though an increase in compression ratio to 8.1 to 1 and a re-designed inlet manifold increase horse-power and torque.

New 3-point engine mounts provide even greater smoothness and flexibility. The use of light weight alloys on clutch housing, induction manifold, transmission cover and other parts has resulted in important savings in weight.

Optional at extra cost on all new Envoys is a 4-speed transmission controlled by a short floor-mounted lever. This transmission has synchromesh on all four forward speeds--- the first time ever on a popular-priced British car. Standard equipment is the 3-speed all-synchro transmission with steering column change and a much - improved control mechanism.

Safety measures abound on the new Envoys-- sharp edges and protuberances have been eliminated; all doors incorporate 'anti-burst' devices in the special locks; vision is improved, with considerably more glass area and a windshield one-third larger; the area swiped by the parallel wip ers is 60% greater than on previous models.

'Controllability' gains significantly from improved location of brake and accelerator pedals, revised instrument panel and controls layout, and increased seating comfort.

Routine maintenance costs on Envoy have been cut because there are only four lubrication nipples, needing attention at intervals of only 12,000 miles. Intervals for other service items are 3,000 miles apart. Brake adjustment is simpler. engine access much easier.

The new Envoys have a long-life cellulose synthetic enamel finish. It is more wear-resistent and retains its lustre longer. Beneath it are several layers of phosphate coating, primer and undercoat. the entire underbody, including the underside of the fenders is sealed and protected with a generous coating of tough bituminous sealer.

Envoy is available in a Custom or Special four-door sedan and a Sherwood Estate Car.

A farmer and a college professor were traveling together on a train. They got tired of talking and reading, so the professor suggested they play riddles "Every time you miss a riddle, you give me a dollar, and every time I miss a riddle, I'll give you a dollar," said the professor. "You're better educated than I am," the farmer pointed out. "I'll give you fifty cents."

The professor agreed, and the farmer made up the first riddle. "What has three legs walking and two legs flying?" he asked

The professor didn't know so he gave the farmer a dollar.

The farmer didn't know either, so he gave the professor fifty cents.

Some of the delegation of Alberta cattle feeders listen attentively to an explanation of the feeding system used at Shelton's Feed Lot near Idaho Falls. Mill in the background is typical of many used by U. S. cattle feeders in self-contained operations.

PEMBINA NEWS ADVERTISER

10¢ PER COPY

Vol. 6 No. 41 November 1, 1961 A. Playford, Publisher. Box 120, Drayton Valley.

Scouters Set Up District Council

Left to right, Doug. Aspeslet, district commissioner for the newly formed Pembina District Council. Bill Johnson, former Scout Provincial Field Commissioner, now employed by the City of Calgary in their Youth program, and on the right Alberta Wendt, of Sangudo, president of Pembina District Council.

In Wildwood last week a District Council for the Boy Scout Association was set up when Scout leaders and group committees met with Mr Bill Johnson, Scout Provincial Field Commissioner, in the Wildwood School.

The meeting came as the result of a Manpower Committee that had been appointed previously to start preliminary action towards the formation of the district council. Purpose of the district council is to tie in the activities of a number of Scout committees in various towns, so that they may work under a correlated program in Scouting activities. Representatives from Drayton Valley on the Manpower committee were Mr Jack Bright and Mr Ben Herold.

The group meeting in Wildwood last Thursday finalized the plans for the setting up of the inter-district District Council. The group voted to call the name of the council the Pembina District Council. As the present time it will include places where Scouting activities are now underway, Drayton Valley, Lodgepole, Wildwood, Whitecourt, Mayerthorpe and Sangudo. The district will include, however, Seba Beach, Wabamun, Entwistle, Evansburg, Gainford and a few other local points and whenever scouting programs are established in these places they will automatically become members of the Pembina District Council.

An executive board was nominated and elected at the meeting in Wildwood. President of the newly formed district council will be Mr Albert Wendt, of Sangudo. Secretary will be Mr William Britt, also of Sangudo. 1st. vice-president will be Mr Bob Piper, of Whitecourt, Mr Ken Wardlow, of Drayton Valley is treasurer. The offices of 2nd. and 3rd. vice presidents will be filled by a member from Lodgepole and Wildwood. Board members will be appointed also at the next district meeting.

Mr Doug Aspeslet, formerly of Drayton Valley, now living in Whitecourt, was elected District Commissioner for the Pembina District Council.

(Cont'. on page 4, Col. 5)

Gerald McMorris demonstrates how to make yardage with teamwork. Ken Sleben clearing the way.

Gerald and Ken are two members of the Delphic Football Team representing Drayton Valley at Bantam level. This team has won four of their five games this season, and have scored a total of one hundred and seven points while giving up only twelve.

This Sunday they face their toughest opposition in the Edmonton Mac Bull Dogs here at our field at one p.m. Let's show Edmonton we have football supporters as well as football teams.

SEE THIS LAST BANTAM GAME OF THE SEASON SUNDAY.

"Search for Talent"

A finalist in last year's Search For Talent will appear as a guest soloist at the Drayton Valley Search for Talent show scheduled for the Frank Maddock School Auditorium on Saturday, November 4th.

Miss Louise Blake of Devon has been selected as the guest soloist for Drayton Valley, according to Mrs. Muriel Boles, president of the Drayton Valley Ladies Auxiliary to the Legion.

The Legion Auxiliary are sponsoring Search for Talent again this year after participating in a similar capacity last year at one of the largest nights of Search for Talent in the history of the project. One year ago, two shows were necessary due to the overflow audience at the Elks Hall. This year the show will be held at the Frank Maddock High School through courtesy of the Stony Plain School Board.

Miss Blake's appearance to the show is a new feature added this year. The Associated Canadian Travellers who conduct the Search for Talent Tour each year, select a former winner of a talent show to appear as a guest on a show being held near the place of residence of the artist. Miss Blake, a sailor dancer, will appear at Leduc on November 18th as well. She won sixth place at the Search for Talent finals last April.

A full quota of twenty contestants is expected by officials and all the entries are urged to be at the school at 4 o'clock for auditioning and program placement. Jack Benbow is in charge of the show, which also includes Spotlight Parade, a fast-moving variety show featuring prominent Edmonton radio and television personalities.

Proceeds from Search for Talent go to the A.C.T. Northern Alberta Crippled Children's Fund in support of needy crippled children.

Football

By Mike Gormley.

DELPHICS WIN 31-0 IN CITY.

The Drayton Valley Delphics, Harold Townsend's flying Bantam football squad, struck back from a poor showing on Saturday to swamp the Kelley's Carts 31-0 in a game played at Cemation Park in Edmonton Sunday afternoon. The local Bantam outfit were really up for this one and despite a rather shaky start, possibly brought on by the fairly hostile Edmonton fans, the boys really got down to business before too long.

Gerald McMorris who had a great day started the ball rolling with a key interception, his fifth of the season. From here the Delphics went up the field in a series of unbroken downs and McMorris went over through the middle of the line for the first major score. A

(Cont'. on page 9, Col. 1)

District Personalities

Mr. NICK KLUSS.

Northwestern's new local agent for Drayton Valley, Nick Kluss, has moved to Drayton Valley from Edmonton where he has been employed with the gas company for a number of years in their customer service department. During this time he has been a relief man in the various communities and is completely familiar with the work of the local agent.

Mr Kluss is married and has four children. He and his family expect to move into the gas company agent's house in Drayton Valley November 1st.

Mr Kluss comes to replace Leo McKernan who was appointed Northwestern's local agent in Rocky Mountain House, a community newly served with natural gas this year.

COUNCIL MEETING

On Monday morning at 8:20 a.m. the first meeting of the New Council got underway.

Mayor Adrian Meier, Dep. Mayor Donald G. McKenzie, Councillor Harry Kolmer, John Ewanio, Karl Wahl and F. Earl Thompson were present.

The Mayor Elect Adrian Meier and Councillors Elect Karl Wahl and F. Earl Thompson were sworn in by the Secretary-Treasurer.

After the swearing in ceremony had been concluded the following Committees and Representatives to other Governmental bodies were selected and appointed.
